

# Scheherazade New - Announcement

We are very pleased to announce a new release of Scheherazade New, an Arabic script font designed in the traditional Naskh style.

## Changes

This release includes the following changes for this version:

### New

- Added:
  - 20C1 SAUDI RIYAL SIGN

### Improved

- Improved kerning in the context of madda above:
  - U+067C ARABIC LETTER TEH WITH RING
  - U+0751 ARABIC LETTER BEH WITH DOT BELOW AND THREE DOTS ABOVE
  - U+0754 ARABIC LETTER BEH WITH TWO DOTS BELOW AND DOT ABOVE
  - U+08BE ARABIC LETTER PEH WITH SMALL V

### Known issues

- Shaping for the newly added characters may not yet occur in applications
- Medial and final high hamza characters may have collisions (these likely do not occur)
- Lam + high hamza alef ligature does not form as it likely does not occur
- In InDesign: some behaviors, such as the *lam-alef* ligature, raised *kasra* with *shadda*, and subtending marks, will not function correctly unless **Ligatures** is turned on in the **Characters** panel.

Both desktop and web fonts are provided in a single, all-platforms package on the [Download page](#).

This guide is from the [Scheherazade New project](#) version 4.5 and is copyright © 1994-2026 SIL Global.
